

## Search Engine Optimization - PRE-ANALYSIS SERVICE

Search Engine Optimization is one of the most appropriate and most effective marketing approaches for gaining targeted high quality traffic to your web site, by maintaining top rankings in important Search Engines like Google, specifically for your industry area and your specific business key words.

However, every web site finds itself in a very individual situation when it comes to SEO. Every web site and associated SEO campaign needs to be pre-analyzed and planned carefully, with close consideration of the specific market and marketing circumstances and options appertaining to the industry with which your web site is connected and even closer consideration of the individual products and services that your web site is distributing.

**Have your existing web site subject to Professional SEO Pre-Analysis for specifying your individual SEO Strategy.**

Tailored to your web site in your specific industry, our SEO Pre-Analysis Team will deliver a sophisticated report that will give you an invaluable insight into technical deficiencies identified on your site, suggested contextual improvements and optimizations, among other recommendations on how to make your web site qualify for top positions in Search Engines. This report also includes a detailed quote for the actual execution of your individual SEO campaign.

Please contact us ([service@panama-creative.com](mailto:service@panama-creative.com) or by phone (+507) 265-8436) for more information and a Full Demo Report. The associated cost for your personal SEO Pre-Analysis Report (created within 5 business days) is **USD 150 - fully refundable** in the instance of an actual SEO order to Panama Creative at a later point in time.
